

# Managed Hosting for Magento and Adobe Commerce

made by eCommerce experts

Magento websites are very dynamic and resource-demanding because they generate pretty much data and uncachable requests.

So you need a proper PHP version, reliable database and caching solutions.

**And fault-tolerance infrastructure to handle all this**

Slow hosting + Magento store = Low sales and revenue

**This is why it's so important to choose  
WooCommerce hosting that really works!**

# 70%

of consumers admit that page speed impacts their willingness to buy from an online retailer \*

\* Unbounce

# 53%

of visits are abandoned if a mobile site takes longer than 3 seconds to load \*

\* Google

# 13%

of all checkout abandonment in online shops happens because of website errors and crashes \*

\* Baymard

**Boost revenue and user experience  
with Scalesta hosting**

## Global presence

Our goal is to provide users with a **FAST, QUALITY** and **RELIABLE** connection wherever they are.

We chose 15 data centers around the world from California to Sydney as our technology partners.

No matter where you are based, we will find a data center  
that works BEST for your business!

# Hosting that grows together with your business

## Only necessary expenses

We choose resources for the actual load and the dynamics of its growth. Just as much as required at the moment.

## Scalable solutions

No need to change your hosting plan during traffic peaks. Before the resources run out we scale server capacity up and down automatically.

# Hosting that grows together with your business

## Custom plans

Dedicated care for projects demanding load balancing and extra security protection. Concentrate on business, we'll cover your back.

## DevOps practices

Automation of software deployment and easier changes. Achieve business goals faster by accelerating deployment of new features, security recovery and bug fixes.

## Free seamless migration or clear installation
